Presented at
NABSHOW™
Where Content Comes to Life™

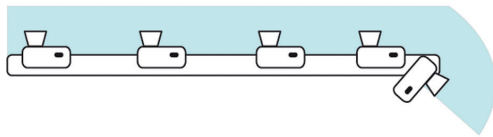

Target Mode

Keep the focus onto the subject during the full tracking shot. It's perfect for interviews, talking heads, and macro shots

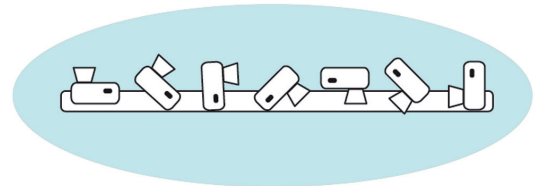

Panorama Mode

Emphasize the location due to its absolute perfect 360° shots.

Async Mode

Be free to pan your camera exactly in the point you like.

Spin Mode

Boost your creativity with an unique movement never seen before.

Simply choose the keyframes, the CPU will do the rest. It does not require specific measurement calibration nor a fixed distance from the subject.

THE PLUS

AutoPan is always with you thanks the HPRC 2100 case included
