

Avid Mojo SDI and Avid Mojo Portable and powerful digital and analog I/O

Compact enough to take on location yet powerful enough to serve as the core of a professional video-editing suite, Avid Mojo SDI and Avid Mojo hardware connect to both laptop and desktop systems, both Mac and PC, with a single IEEE-1394 (FireWire) cable. Unlike other add-on hardware, they let you capture audio or video while also providing output of the same source, so you can monitor what you're capturing, including watching video on a client monitor while recording voiceover – impossible with hardware from other manufacturers. In addition, Avid Mojo and Avid Mojo SDI let you monitor and output HD timelines in SD with real-time down-convert.

Avid Mojo SDI provides the highest quality professional SD connections to facility-class cameras, decks and digital pipelines. In addition to serial digital video, Avid Mojo SDI also provides I/O for IEEE-1394, and either component or composite and S-video. Mojo SDI supports up to 8 channels of embedded audio over SDI and 2 channels of optical S/PDIF audio, with additional connections for 4 channels of AES/EBU audio.

Avid Mojo offers uncompressed analog SD video support over S-video, composite and optional component video, along with built-in support for IEEE-1394 capture and playback.

Both offer simultaneous output to both broadcast monitors and tape, and feature Genlock and Word Clock for video and audio sync with external devices.

Avid Mojo and Avid Mojo SDI are compatible with Avid Xpress Pro, Avid Media Composer, Avid 3D, Avid FX, Avid NewsCutter XP, and Avid Pro Tools LE (Avid Mojo only). Avid Mojo is included in Avid Xpress Studio Complete.

Avid Mojo Features

Connect more, see more, and do more.

Avid Mojo and Avid Mojo SDI hardware expands the power and capability of Avid software with expanded I/O, hardware acceleration, and preview to a client monitor.

System requirements

Avid Mojo and Avid Mojo SDI require a qualified platform with an IEEE-1394 port. For detailed system requirements, see the Avid Xpress Pro Specifications page.

Size and Weight

6 3/4 " (17cm) wide by 11 1/4" (28.6cm) tall

Only 1 inch (2.5cm) thick

1.5 lbs (.68 kg); 2.82 lbs (.1.28 kg) with stand
