

CNS1000 can drive one ELPRO Matrix Switcher by RS232

CNS1000 can drive more than one ELPRO Matrix Switchers through LAN / Internet

More than one CNS1000 can drive one ELPRO Matrix Switcher through LAN / Internet

MACRO COMMANDS

It's possible to create some packets commands, by serial programming, that can be associated to the alphanumeric keys, to be sent to more than one machine. In this way, pressing one button only, it's possible to activate an event sequence in the units connected to the CNS1000: this feature is very useful in video studios or room control.
