

## Breakthrough Duplex Wireless Systems

### COMSTAR is a breakthrough full duplex wireless

designed specifically for production teams that need to communicate and work with their hands. These revolutionary intercoms are not voice activated and there is no delay when transmitting. The system allows up to eight wireless users to talk simultaneously just like on a regular telephone within a 800 yard range.

- ✱ Digital, Full Duplex Voice  
Dect frequency band (1900 mhz) is reserved by FCC for "PCS" voice communication only.
- ✱ Totally Portable  
AC wall plug, rechargeable battery (6 hrs), and AA disposable battery sled included.
- ✱ Simple / Instant Setup  
Self tuning, no antenna required.
- ✱ No FCC License Required.  
USA, Canada, Europe & Australia certified.

**XT Com-Center** To complete your system, you will need one XT Com-Center, and any combination of up to eight wireless. All systems include rechargeable batteries, & multi-port charger. Deluxe padded case also available.

**COMSTAR "All-in-One"** duplex headsets feature miniaturized wireless circuitry and antenna built into the earcup. This provides ease of operation as well as outstanding full duplex communications. No beltpack required!

- ✱ Weighs only 12 oz.
- ✱ Mic mute button installed on earcup.
- ✱ On / Off, volume control on earcup - silicone sealed.

COMSTAR SINGLE  
COMSTAR DOUBLE  
Single Ear Radio/Headset  
Mic adjusts L or R

**COMPAK beltpacks** with lightweight headsets allow users to select the best headset accessory for their specific application. This is an outstanding benefit for those operating in low noise environments.
