

Clear-Com offer a versatile range of headsets, handsets and Microphones that are designed to give excellent audio quality, comfort and ease of use to suit every need. Our range of headsets can be used with all Clear-Com Party-line and Matrix products as well as wired and wireless belt packs.

Headsets

CC-260

The CC-260 is a double ear enclosed durable and professional headset that offers full range audio response and great comfort. The CC-260 includes an enclosed ear design with leatherette cushion to reduce background noise and provide excellent acoustic isolation. The boom microphone is equipped with a noise cancelling mic element and 270 degree rotation for left or right side use. A range of replacement parts are available to support the CC-260. For more information please contact your local Clear-Com representative.

CC-95

The CC-95 is a single ear enclosed headset that offers the same full range audio response, acoustic isolation, comfort and durability as the CC-260. The 270 degrees boom rotation offers the user the option of left or right ear operation. A range of replacement parts are available to support the CC-95. Please contact your local Clear-Com Representative.

CC-40 & CC-60

The CC40 and CC-60 are single or double enclosed ear general purpose intercom headsets with flexible neck microphones that are ideal for minor adjustments. The headsets offer a durable design with comfort and excellent audio isolation. A range of replacement parts are available to support these headsets. Please contact your local Clear-Com Representative.

CC-25

The **CC-25** is a super light weight headset with electret microphone. The microphone is only available with mini Jack plug for use only on 600 Series belt packs.

CC-26K

The **CC-26K** is a single open ear, lightweight headset with an over-the-head design. The dynamic noise cancelling microphone improves voice clarity and flexible neck boom.

CC-27

The **CC-27** is a contemporary design, single-ear, wrap around ear worn headset. The dynamic noise cancellation microphone offers excellent frequency response and accurate voice pick-up. This headset offers great comfort during prolonged use.
