# YOU PLAY

**YOU PLAY** is the smartest video player for your television production environment.

New tapeless workflow finds in **YOU PLAY** the cleverest way to playout video during live production: from on-air video contributions for news, talk shows, events coverage.

**YOU PLAY** is the ideal assistant to fill background screens or videowall, featuring also loop of clips or playlists, play/stop from still frame.

Thanks to **Axel's** experience in broadcast automation, **YOU PLAY** has been designed to be a real multiple-formats player with a user-friendly interface that fits perfectly into your live production with no need of **training or skilled operators.**

## COMPLETE & SCALABLE MULTIFORMAT SOLUTION

**YOU PLAY** features "multi-format and multi-codec compatibility" and provides full video controls during production contributions such as: count-up, remain, total remain, fields changing options.

With an easy configuration you can set the output in HD/SD with auto up/down scale of the video files with no renders or transcoding, giving the editors the possibility to export from different NLE and directly go on-air.

Each workstation can run up to 4 different instances of **YOU PLAY**, to manage 4 separate video channels for many purposes, such as: news playlist, video contribution on shows, loops on video wall and many more.

## SMART & FLEXIBLE FEATURES

**YOU PLAY** solve all the needs of a live contribution in a tapeless workflow and thanks to its flexibility it can be integrated in any production environment.

Video playlist and single clips can be managed in several ways according to the application:

- Drag & Drop media directly from windows desktops and folders.
- Add any clip at the very last second.
- Playlist creation, save and retrieve.
- Setting of playout parameters for playlist or single clip, such as: plat/stop on a still frame, loop all or loop just a single file etc.
- Autoimport: the "watch folder" engine automatically updates the playlist checking the content of a specific folder.
- Instant jingle machine: with the hot keys function, assign up to 12 videos clips to your keyboard always ready to be played istantaneously; ideal to playout elements that can't be scheduled (for example: billboards /bumpers /jingles) during live events.
