Product Overview

The cabinets of the Hyper Series were designed for the user-friendly installation of active- and passive network components accompanied by a neat cable management. Each rack consists of up to 1.5 mm strong steel sheet material which ensures a very good stability as a robust steel construction due to special plate curving technique. The color is created by powder coating in grey (RAL 7035) and on request also in black (RAL 9005). All cabinets are produced according to several norms to meet the compliance requirements. For certain conditions, where the set-up location is difficult to reach, the cabinet comes as disassembled flat pack. An extensive portfolio of accessories for cable management, shelves, etc. will help to meet many requirements in daily use.
