

BeachTek The Quiet Connection

DXA-10

Stereo Microphone Preamplifier

Exclusively From
BeachTek

Exceptionally quiet dual channel preamplifier. Ideal as an XLR mic to RCA line level amplifier to connect to MiniDiscs and other audio recording devices.

Sounds Great

The DXA-10 is a two channel, battery-powered microphone preamplifier with built-in phantom power. Easily connect balanced XLR microphones to consumer audio recording gear. Studio quality audio and professional +/- 15 volt rails for lots of headroom. The slideout drawer makes battery replacement a snap. Rugged construction ensures years of use and the removable belt clip makes it perfect for portable applications.

DXA-10 Features

- Two balanced XLR microphone inputs
- Two line level RCA outputs
- Mic level stereo mini-jack output
- Dual low noise preamps with +/- 15 volt rails for plenty of headroom
- High / Low gain settings for dynamic and condenser type microphones
- 20 Hz to 20 kHz audio bandwidth
- Dual switchable 48 volt phantom power for condenser microphones
- Easily replaceable 9 volt battery
- LED battery indicator
- Removable belt clip for easy portability
- Sturdy extruded aluminum chassis
- Superb sound
