

BeachTek

The Quiet Connection

DXA-8

Ultimate Adapter

Exclusively From

BeachTek

The ultimate adapter for DV camcorders. Two channels with preamps, limiters, and phantom power

Can be handheld or tripod mounted

Sounds Great

The DXA-8 Ultimate Adapter is a superb front end for DV camcorders. Low noise preamps provide clean, powerful audio levels from virtually any microphone and the output level is preset to the sweet spot for the best signal-to-noise ratio. The no fuss limiters eliminate distortion caused by overly hot inputs for great sound every time. Easy to set up - only requires the adjustment of one gain control for each channel. Limit indicating LED's ensure proper gain setting. Dual 48 volt phantom power for professional microphones. One sweet package!

DXA-8 Features

- Dual no fuss limiters with LED indicators
- Dual Infinitely adjustable gain
- Dual switchable 48 volt phantom power
- Dual XLR balanced inputs
- One unbalanced mini-jack input
- Transformer isolated inputs and outputs
- Uses one 9 volt battery
- LED battery power indicator
- Sturdy extruded aluminum chassis
