

Epson EB-Z8350W/NL Projector

DATASHEET

As one of the brightest products in Epson's range, the EB-Z8350W/NL suits the needs of demanding large venues. Designed for installation in government and educational establishments, auditoriums, museums, conference or exhibition halls, its 8,500 lumens delivers clear and vivid images at WXGA resolution with ease.

The projector offers first class adaptability, as it is compatible with all existing optional Epson lenses, or comes in a version without a lens. The flexible installation angle caters for both front and rear projection systems. The WiFi connectivity combined with a wide lens shift range both vertically and horizontally make for easy integration into any environment.

Do more with your projector, as the EB-Z8350W/NL is packed with features. It offers Edge Blending for the very first time, stacking up to four projectors horizontally and two vertically.

And Epson's Super Resolution feature delivers a smooth, high-quality image, every time.

Alongside this, the Point and Arc Correction features allow for uneven screens and the built-in test patterns handle image calibration with ease. And tap into Epson's EasyMP software to deliver split screen functionality, multi-PC projection and stream videos via WiFi.

Finally, Epson's 3LCD technology ensures high-quality images with its equally high White and Colour Light Output for vivid, natural colours and deep blacks, even in daylight.

KEY FEATURES

- 3LCD technology for equally high White and Colour Light Output
- Compatible with existing Epson optional lenses
- Flexible installation angle of up to $\pm 100^\circ$
- Wide horizontal and vertical lens shift
