HKSR-103

RGB 60P Processor board

The HKSR-103 board is a powerful option for the SRW-1, and adds RGB 4:4:4, 1 to 60 frames per second (fps) recording to the Select FPS function.

When the SRW-1 recorder is docked directly onto the F23 camera, and the optional new HKSR-103 RGB 60P Processor board is installed*, it is possible to record at 1 to 60 fps for 4:4:4 RGB signals. This powerful feature has never been achieved on other VTRs.

*For this operation, both the optional HKSR-102 and HKSR-103 are required.

This product comes with PrimeSupport – fast, hassle-free repairs and a helpline offering expert technical advice. Which gives you the peace of mind that Sony is looking after your equipment, and your business.
