Accessories for DSLR cameras with video function

Canon EOS 5D MKII / III, 550D, 600D, 7D, 1D Mark IV, Nikon D90 and others with similar size – LWS 401- 421S

Canon EOS 5D MKII / III with battery pack, Nikon D3S, D1, D800 and others with similar camera body size – LWS 401- 93

Lightweight support

LWS Lightweight supports:

They consist of a base plate and a construction which brings your camera to the normative height, a rod clamping and the actual support rods. These aluminium rods have a Ø of 15mm.

With the suitable LWS for your camera various accessories are compatible: E.g. follow focus DV StudioRig, MatteBox, lens support bracket and many others.

The lightweight support **401-421S** comes with a twist stopper (see picture on the right).

LWS **401-93** for Canon EOS 1D sizes holds the camera in place by means of the rod clamping (see picture above).

For tripod use a 1/4" and 3/8" thread on the base plate is provided.

Please note!

For Canon EOS C300/500 use LWS 401-94/HD

Lightweight support, choose according to your camera:

401-421S LWS Lightweight support with twist stopper for DSLR e.g. Canon EOS 5D MKIII, Canon 550D, Canon EOS 7D Nikon D90 with rods Ø 15mm, length 205mm 315.00 €

401-93 LWS Lightweight support for DSLR camera with big size housing, e.g. Canon 1D MK IV, Canon 5D MK III with battery pack, Nikon D800 with rods Ø 15mm, length 100mm 299.00€

Accessories for your lightweight support:

401-01VT VariTube® telescopic rods (1 pair), length 150-230mm 98.00 €

401-14 Extension rods 50mm (1 pair) 30.00 €

401-83 Extension rods 100mm (1 pair) 30.00 €

401-83-190 Extension rods 190mm (1 pair) 52.00 €

401-421S

Lightweight support DSLR (see above), incl. twist stopper for a.m. cameras and others with similar camera body size

401-93

Lightweight support DSLR cameras with big size housing, e.g. Canon 1D MK IV, Nikon D3, D1, D800 or Canon 5D MK III with battery pack

401-83 extension rods, 100 mm.

The standard rods of our lightweight supports have a screw-in thread, for optional use extension rods.

401-01VT150 / 401-01VT200

VariTube telescopic rods are adjustable in length from 150-230 / 200-280 mm. e.g. for 401-93 LWS

- 206-65S** DV StudioRig **plus** Photo, with reverse gear, complete with VariLock 2 hand wheel, scale, focus drive 0.8

Rec. retail price

765.00 €

822.00 €

1,236.00 €

1,295.00 €

Gear ring focus, please choose according to your lens (all mod. 0.8):

- 201-19** Gear ring fix for Canon EF 24-105mm Ø 82mm 113.00 €
- 206-753** Gear ring splitted for Canon EF-S 18-135mm Ø 75.3mm 133.00 €
- 206-720** Gear ring splitted for Canon EF 15-85mm Ø 72.0mm 133.00 €
- 206-836** Gear ring splitted for Canon EF 24-70mm Ø 83.6 mm 133.00 €
- 206-890** Gear ring splitted for Canon EF 70-200mm Ø 89.0 mm 133.00 €
- 206-30** Gear ring flexible adjustable, for photo lenses Ø 60-120mm, rotation angle approx. 270-320° 109.00 €

Follow focus system:

Helps you to pull focus precisely and to mark your focus range on the scale of the hand wheel. The **VariLock 2** feature allows you to set two focal planes individually, to ease rehearsals and to manually control auto focus lenses.

The mentioned DV StudioRigs are equipped with 15mm rod clamping, hand wheel with scale and focus drive mod 0.8.

To mount your follow focus system, use a rod system with 15mm. Please choose the suitable LWS lightweight support for your camera.

206-05SP

206-05SP & 206-65S Studi Rigs are equipped with a reverse gear. Some lenses rotate against the standard rotating direction (standard e.g. is Canon EF) therefore a reverse gear is necessary to come back to the usual rotating direction.

206-05S-12

The **VariLock 2** function gives you the opportunity to set two variable focus points – you can work even without an additional operator.

206-753
Gear ring

206-30
Gear ring, flexible for lens diameters 60 – 120 mm.

Recommended retail prices in Euro without tax, ex works, subject to change without further notice, issue 05/2012
