

# ListBox

- ▶ **ListBox is an offline schedule editor, providing sophisticated editing facilities such as text searching, clip copying/pasting, schedule printing, etc.**
- ▶ **It is the main tool for the Program Editors, enabling them to create and edit schedules many days and weeks in advance.**
- ▶ **No special server or hardware is required. ListBox runs flawlessly on a notebook, even with software MPEG2 trimming and previewing. Its playlists are 100% compatible with AirBox for on-air usage.**

## **Sophisticated editing facilities**

ListBox provides all necessary editing facilities for convenient playlist creation. You will find all expected features such as searching, cut/copy/paste, multi-selection editing, ordering facilities, playlist printing, and last but not least - multi-level undo/redo.

## **Last-minute clip editing**

Simple clip editing tools are provided within the integrated clip trimmer. It allows discarding unnecessary footage, clip splitting, last-minute order reversal within the same clip. Forget about returning the clip back to the editing suite - no need and no time! You can even edit the on-air playlist, AirBox will automatically reload the new playlist on the next event .

## **Traffic system integration**

ListBox imports traffic logs from third-party scheduling and traffic systems. This is achieved by using our universal tab-delimited and comma values (CSV) import engine.

## **Excellent price/performance ratio**

ListBox does not require expensive hardware or ultra fast workstations, thus avoiding unnecessary expenses. All content previewing and editing is done by software decoders.

## **Intuitive operation**

Add clips by just drag-n-dropping them from Windows Explorer or DataBox. Arrange their order by dragging them around. Separate program slots are colored in a different manner depending on logo presence or absence.

## **Straightforward, user-friendly interface**

No need to learn from scratch. ListBox's user interface looks quite familiar as a standard Windows software . Most users start instantly working with it even without reading the User's Manual.

## LISTBOX SPECIFICATIONS

### File Formats

<b>MPEG2</b>	MPG or M2P - Program Streams
	M2T or TS - Transport Stream
	OpenDML AVI and WAV files (mono and stereo)
<b>DV</b>	OpenDML Type1 & Type2 AVI, QuickTime, Raw DV
<b>HDV</b>	MPG or M2T - Transport Stream

### Playlist Events

<b>Fixed-time</b>	Schedule timed events
<b>Stop</b>	Stops playback execution until manual resuming
<b>Wait</b>	Stops playback execution for a pre-defined period
<b>Wait until</b>	Stops playback execution until a specified time
<b>GPI</b>	Sends GPI triggers to external devices
<b>Matrix switcher</b>	Sends commands to external switchers
<b>VTR</b>	Allows tape-based events in the playlist
<b>TitleBox control</b>	Sends titling commands to TitleBox modules
<b>Logo on/off</b>	Displays or hides the designated logo presets
<b>Notes</b>	Useful for playlist-related custom information

### Minimum System Requirements

<b>CPU</b>	Intel Pentium III at 1 GHz or faster
<b>RAM</b>	256 MB
<b>Audio</b>	Sound card for Clip Trimmer audio preview
<b>Operating System</b>	Microsoft Windows XP (SP2)

### Other Applicable Modules

<b>CaptureBox</b>	Automated content ingest
<b>AirBox</b>	Universal content p layout
<b>DataBox</b>	Powerful content database
<b>TitleBox</b>	On-air graphics insertion
<b>SafeBox</b>	Automated content replication and removal
