SONY

SONY RM-B150, REMOTE CONTROL UNIT

Handheld remote control unit for BVP-950A, BVP-750A, BVP-570, BVP-550, HDW-700A, HDW-F900, DSR-450WSL. This unit utilizes the new studio camera command system and may be used in applications or in place of RCP-700 series remote control panels. It is supplied with a 10M interconnect cable. 50M and 100M interconnect remote cables are available via special order. When used with the above interconnect remote cable a monitor output for a picture monitor is provided on the RMB-150 (for all camcorder series except HD) . Alternate Cables: CCA5/3US, CCA5/10US, CCA5/30US, CCA5-XXXUS series of cables may be used if "control only" function (without picture monitoring function) is desired.
