

SG 201 is an interface and selection unit suited for two computer from which receives the graphic signals with the combined audio. The output can drive an external unit like a videoprojector or monitor. Audio output can be connected to an external sound diffusion system.

L'SG 201 è un'unità di interfaccia e selezione atta a ricevere i segnali grafici e relativi audio da due computer. L'uscita è adatta per pilotare un'unità esterna tipo un videoproiettore o monitor. L'uscita audio può andare verso un sistema di diffusione sonoro esterno.

- Video and stereo audio inputs for 2 computer
- Manual, by RS232 or dry contacts selection
- Autoswitching, autosequencing and toggle functions
- Output sync programmable (RGSB, RGBHV, SOG)
- Horizontal adj for each computer
- Buffered BNC output
- SVGA, XGA, MAC, SUN and SGI compatible

- Ingresso grafico e audio stereo per 2 computer
- Commutazione manuale, da RS232, da contatti secchi
- Autoswitching, autosequencing e toggle
- Sincronismi in uscita programmabili
- Centraggio orizzontale per ogni computer
- Uscite di potenza sui connettori BNC
- Compatibile SVGA, XGA, MAC, SUN e SGI

SPECIFICATIONS

Type of control	:local by keyboard remote by dry contacts remote by RS 232	Out sync on BNC V	:TTL pos/neg
Auxiliary functions	:autosequencing, autoswitching and toggle	Bandwidth	:300 MHz
Audio inputs/output	:stereo jack sockets 3.5 mm	Driving capability	:>100 mt. RG59 B/U cable (BOOST ON)
RGB signals	:analog	Main input (with AC adapter ADM 001)	:230 Vac 50 Hz
Input impedance	:automatic, high Z or 75 Ω	Power consumption	:5 VA
Input synchronism	:Hs and Vs TTL pos/neg or Comp. TTL on Hs	Size (WxDxH)	:220 x 100 x 55 mm
Input connectors	:N°2 HDD 15 p. m.	Weight	:0.7 Kg
Output connectors	:N°2 HDD 15 p. f. for local monitors 5 BNC for remote monitor or projector.	Operating temp. range	:0 ÷ 45°C
Out sync on BNC H	:Programmable: composite TTL, or H TTL.	Safety	:according to EN 60065
		EMC	:according to EN 55103-1 and EN 55103-2
