MIRROR IMAGE

SP-LCD

Step 2:

Insert pole into box. Tighten plastic knob to hold pole in place.

Step 3:

Attach VGA or video cables to monitor.

* SP-150/180-LCD requires the use of the MI Reverse Amp/Splitter.

Step 4:

Screw glass holder onto top of pole. Place monitor in box with base edge and menu buttons toward pole.

SP-LCD

Step 5:

Slide mirror into glass holder and tighten knobs. Prompter should be approximately arms length from podium at 45 degree angle.

Step 6:

Connect cables to your computer (SP-150/180-LCD requires the MI-reverse box to be connected in line), splitter, and power supply.

Test the monitor and mirror to be sure that the image aligns properly.
