

SR-HD2500 Blu-Ray and DVD Recorder

The SR-HD2500 is the only BD Recorder with the SDI interface that's been adopted by the industry. Based on the design and technology of the SR-HD1500, the SR-HD2500 makes it possible to record High Definition content to HDD, and create Blu-Ray discs easily and efficiently.

Our new combo deck allows the user to create standard Blu-Ray high-definition discs or common DVDs from a large variety of high definition content sources without the need to utilize complex software or IT hardware.

Through its support of industry standards, the SR-HD2500 is also compatible with all other HDV or AVCHD cameras on the market, offering the benefit of easy content distribution for any user who shoots on an HDV or AVCHD camcorder. Further more, the new SR-HD2500 allows direct recording to Blu-Ray disc from the HDSDI Input and the new option of adding a time stamp to your recordings for documented content.

For clients who still distribute their content in standard definition the new combo decks provide automatic downscaling of high-definition content to allow the burning of standard definition DVDs.

Features:

- Blu-Ray and DVD Recording
- Direct HDSDI IN to disk burning
- Integrated 750GB hard drive for content ingest, storage and manipulation
- SDHC card reader with support for QuickTime .mov files for example shot on JVC's GY-HM100 and GY-HM750 camcorders in SP mode
- Supported Formats: VIDEO - MPEG2TS / MPEG2PS / H.264 AVC
- Audio - Dolby Digital/LPCM
- Recording with time stamp
- RS 232 port for remote control
- Remote control (RS-232C)
- SDHC card reader
- Firewire connection
- Creation of sophisticated BDMV Blu-Ray discs with user definable menus
- Creation of standard definition DVDs directly from high-definition content
