Ultra fast for capturing
high definition 4K video

Sony SxS-1

Sony SxS-1

Faster speed, higher capacity

Since its launch in 2009, Sony SxS-1 media has boosted flexibility for professional videographers using XDCAM™ camcorders. Now this highly affordable flash-based memory card expands XDCAM™ applications with a new higher capacity of 128GB. This makes SxS-1 ideal for shooting long dramas, documentaries and sports events without high cost. Efficiency is also improved on all models with a transfer speed of 3.5Gbps (440MB/s)*.

Higher capacity for longer shoots

The new SBS128G1B with 128GB capacity allows XDCAM™ users to record up to 240 minutes of MPEG 422 30p (50Mbps). That's perfect for all kinds of broadcasting from 'on location' documentaries to sports events, music festivals and fulllength dramas.

Maximum productivity with faster transfer speed

Transferring high definition video footage is now quicker than ever with SxS-1. The cards can transfer data at up to an astonishing 3.5Gbps (440MB/s)*.

*Based on Sony internal testing. Transfer speed may vary and depend on host device

Key benefits

- Reading speed up to 3.5Gbps
- With one 128GB card, shoot 20 minutes of 4K XAVC Intra 422 60p (600Mbps) video or 240 minutes of HD MPEG422 30p (50Mbps) video
- Lifetime indication and salvage function
- "Memory Media Utility" software included for management of libraries, backups and formatting
- Sony Customer Service includes unique data recovery service

SxS-1 Recording time
