### Taipan UFO, at a glance.

- Specialized and patented design
- High torque custom motors
- Aerospace 7075-T6 aluminum main parts
- Ultra-stiff construction from solid billets
- Multi-modular camera support
- Dual center of mass calibration system
- Genuine Titanium grade 5 thumb screws
- Hard, black, anti-scratch anodization (Al)

*Shown here with ring-like, circular camera array.*

### Native support for integrated systems.

A top-mounted single, 360 integrated unit can be installed onto UFO's quick-release plate through a ¼-20 UNC standard tripod screw.

A modular counterweights system (*not shown*) allows for different camera sizes and weights.

Supported systems:

- GoPro OMNI
- Insta360 Pro
- Obsidian Kandao
- Entapano 3-Cam system (GoPro+Entaniya 220°)
- Etc...

**IMPORTANT NOTE - OPTIMIZED DESIGN.** Tested with the very small Entapano 3-Cam system, the Taipan UFO does not fall into the cameras fields of view.

*Taipan UFO Prototype, shown here with the Samsung Gear 360 for illustration purposes.*

### Fast CG adjustment

Thanks to its unique design, the ring-like, circular camera array can be independently moved up/down from the main structure: this allows for ultra fast center of mass adjustment as well as optical and pitch/roll axes perfect alignment\*.

*\*Camera's body design must have horizontal and / or vertical symmetry.*
