

VP-14 RS-232 Port Extender

The **VP-14** is a unique product designed to distribute RS-232 commands as transmitted by a touch panel control system, personal computer or any other control source to a maximum of three devices or from three control systems to one device. The **VP-14** is an extremely valuable product that was designed for use with Kramer switchers and routers, but it can easily be used with any RS-232 equipment in null-model configuration.

FEATURES

- **Dip Switch Setup Controls** – Convenient DIP selection of Straight, Flat or Crossed wire connection style.
- **Compact Size** – Part of the Kramer TOOLS™ family of compact, high quality and cost effective solutions.
