

## ACOUSTIMASS® 15 HOME THEATER SPEAKER SYSTEM

OUR BEST HOME ENTERTAINMENT SPEAKERS – WITH EXCEPTIONALLY POWERFUL BASS YOU CAN ACTUALLY FEEL.

FROM THE ROAR OF A RUNAWAY TRAIN TO THE SWEET SONG OF A CELLO, bass creates much of the excitement you expect from a high-performance system. The top-of-the-line Acoustimass 15 speakers use a powered Acoustimass module to give you the right amount of bass, all the time – whether you set the volume level high or low, or listen to surround sound or stereo music. During movies, you'll feel bass effects that bring you to the edge of your seat. Switch to music, and the sound remains full and natural. Crank up the volume until your walls shake, or lower it to a whisper. You'll find these speakers consistently offer powerful sound with lifelike realism.

## A NEW EXPERIENCE IN SOUND.

WITH THE ACOUSTIMASS® 15 HOME THEATER SPEAKER SYSTEM, the only thing you'll notice are tiny cube speaker arrays ... until you hear the sound. The other part of this speaker system – its powered Acoustimass module – is engineered to be hidden out of sight. Inside the module, dedicated Bose® amplification for the bass supplements the power of your surround sound receiver. The result is louder, more powerful bass – for an experience with greater impact.

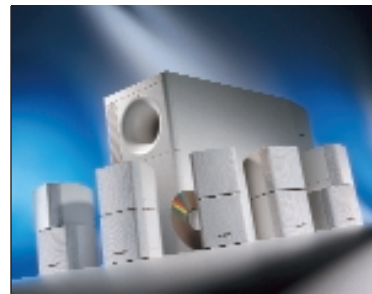

### HOME THEATER MADE EASY.™

The Acoustimass 15 speaker system makes home theater simple. Each cube speaker array is acoustically identical, so you experience lifelike multi-channel sound effects without lots of fine-tuning. When you raise or lower the volume, Bose integrated signal processing automatically adjusts the bass for lifelike realism – letting you enjoy all the performance, even at soft background volume levels where the ear's sensitivity to bass decreases. And Bose multi-channel bass extraction and summation re-creates deep bass for all channels – including the center and surround channels. You enjoy a roomful of high-performance sound – with exceptional bass – without the usual room full of giant speakers.

### SIMPLE SETUP.

The Bose technologies inside these speakers automatically adapt to all surround sound receivers, making setup simple. And the convenience doesn't end there – they arrive in one box with a quick setup guide. The wires are marked to make connection simple. And after the speakers are set up, electronic protection circuitry helps keep them from being damaged at excessive volumes. Hearing is believing! Visit your Bose retailer and ask for a demonstration.
