

Io

- 10-bit Uncompressed SDI or Analog Video
- 24-bit Digital/Optical/Analog Multi-Channel Audio
- RS-422 Machine Control
- Genlock

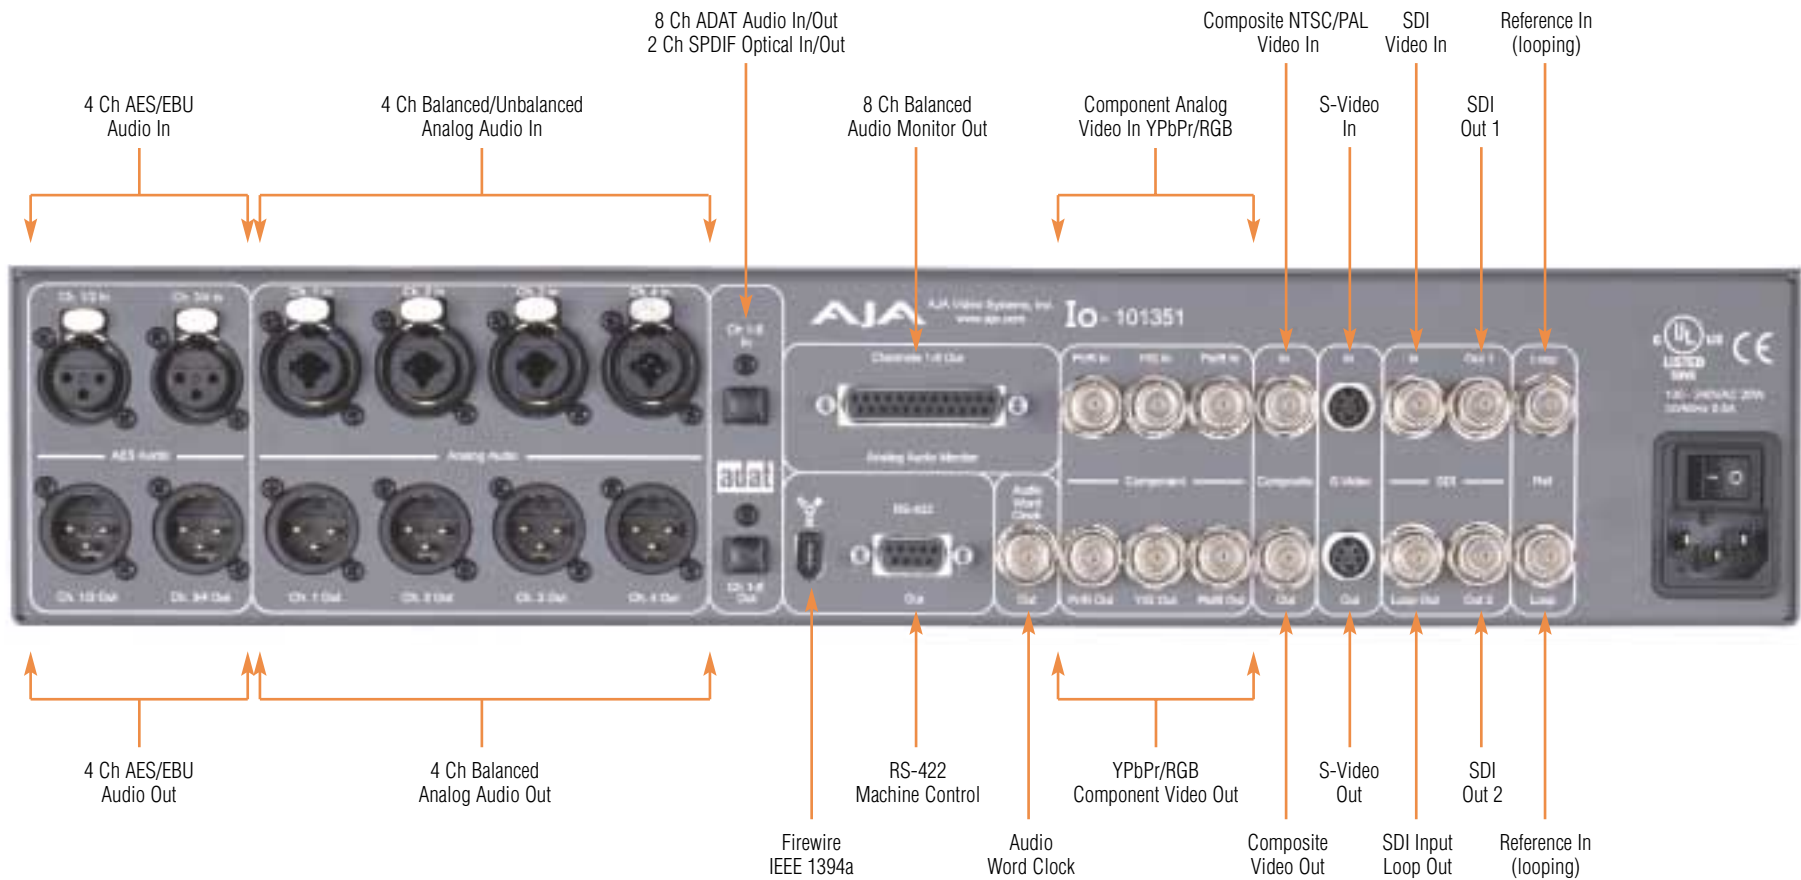

...and connect it all to the Mac via one Firewire cable.

In. Out. Simple.

Truly a new breed of product, **Io** dramatically simplifies professional editing on Mac OS X™.

Io delivers the highest quality 10-bit uncompressed video and multi-channel 24-bit audio, and does it all in a simple plug-and-play form factor. And connecting **Io** to your Mac is easy: just one simple FireWire™ cable. All **Io** outputs are available all the time—allowing simultaneous connections to tape decks and monitoring— analog or digital. **Io** also provides RS-422 machine control, audio word clock, and a professional video Genlock. Developed in close cooperation with Apple, **Io** was designed to take full advantage of Final Cut Pro 4™'s exciting and powerful new features. **Io—In. Out. Simple.**
