Virtual Rider Software

CLK-100 Dual Color LED Chromakey Ring with Retro-reflective screen

Product Information

Using a high efficiency, retro-reflective screen the highly directional LED ring allows you to make beautiful chroma keys with the little attention to background lighting. If your key is set to use the Green LED's and someone comes in wearing Blue, you can switch LED colors and continue keying. This is particularly useful for entertainment applications where the operator has little control over the clothes that the audience wears and the need to produce many dvd's for the customers.

CKL-100 Kit includes:

- 1- Dual blue/green LED chromakey ring
- 1- variable brightness power supply
- 1- camera adapter rings (assortment)
- 1- 2.5 meter x 3 meter retroreflective screen with a loop on the top so it can be put on a pole and grommets below to hang it with hooks.

DVK-100 Kit includes:

- 1 - DVK-100 Chromakeyer, 1- Dual blue/green LED chromakey ring,
- 1- variable brightness power supply, 1- camera adapter rings (assortment),
- 1- 2.5 meter x 3 meter retroreflective screen with a loop on the top so it can be put on a pole and grommets below in case you want to hang it with hooks.
