DVD Creation Station™ 200

Turn Your Photos and Videos into DVDs

The Dazzle DVD Creation Station™ 200 (DCS 200) is the ultimate solution for creating videos and photo slideshows for DVD players. The DCS 200 captures DVD-quality video from camcorders, VCRs or TVs and also reads photos and other files from any digital media card. The DCS 200 includes Dazzle MovieStar™ 5 for video editing, Dazzle DVD Complete™ for DVD authoring and burning and Dazzle OnDVD™ for creating digital photo albums on CD that play on your DVD player. Don't want to make DVDs yet? The DCS 200 also lets you make video tapes, Video CDs, S-Video CDs or Webcast video across the Internet. The DCS 200 turns your PC into a true DVD Creation Station.

Key Features

Capture DVD Quality Video

Connect your camcorder, VCR or TV to the Dazzle® DCS 200 to capture DVD quality video to your PC. All you need to do is connect your video source to the Dazzle® DCS 200 connector box and press the video record button in the Dazzle MovieStar™ software.

DVD Encoder Chip Saves Time and Space

The DCS 200 has a DVD encoder chip inside which automatically converts video in real time into the DVD format before it lands on your hard disk. This shrinks the video to about 1/4th its original size while keeping DVD quality. You not only save a lot of hard disk space but since your video is in the DVD format already, you do not need to convert the video later which can take between 4 and 10 hours per one hour of video.

Easy but Powerful Video Editing

Dazzle® MovieStar™ 5 makes editing your video easy, but it doesn't leave out the powerful features you want. Cut unwanted scenes and add 3D transitions, titles and special effects. Add your favorite background music to set the mood or do a voice-over narration to explain important scenes. Use the storyboard or timeline interface for easy, yet professional video editing. MovieStar™ 5 has Background Rendering, Smart Rendering and Fast Rendering technology for superior speed and performance.

High Speed Integrated 6 in 1 Digital Media Reader

Great videos are even better if you add still pictures for dramatic effect. The DCS 200's high speed integrated digital media reader makes it easy to read photos directly off of the digital media cards from your digital camera. The DCS 200 can read Type 1 and Type 2 CompactFlash™, Memory Stick™, SmartMedia™, MultiMediaCard™, SD Card™ and IBM Microdrive™.

Author your own DVDs

With Dazzle DVD Complete™, it's easy to make DVDs like the ones designed in Hollywood movie studios. The DVD Complete™ project wizard guides you through the five simple steps to go from camcorder to DVD. All you need to know is what you like and DVD Complete™ will do the rest.

Create Digital Photo Albums

Digital cameras allow you to take an unlimited number of photographs that quickly pile up on your computer. With Dazzle OnDVD™, you can take your digital pictures and turn them into photo albums for your DVD player! OnDVD™ makes it simple to turn your digital pictures into home entertainment.

Dazzle Webcast Theater™

MovieStar™ 5 lets you make Real Media™ or Windows® Media internet-ready streaming videos. Then upload them for free to the Dazzle Webcasting site to share streaming video across the internet.

Dazzle® MovieStar™ 5

Easy but Powerful Video Editing

Dazzle MovieStar 5 makes capturing, editing and sharing your video easy, but it doesn't leave out the powerful features you want. Cut out unwanted scenes, add 3D titles, transitions, background music, voice-over narrations and special effects. With MovieStar 5's custom video codecs, you always get the best video quality possible.

MovieStar 5

Dazzle® DVD Complete™

DVD Authoring and Burning Software

With DVD Complete™, it's easy to make DVDs like the ones designed in Hollywood movie studios. DVD Complete's project wizard guides you through the five simple steps to go from camcorder to DVD. All you need to know is what you like and DVD Complete will do the rest.

Dazzle® OnDVD™

Digital Photo Album Creation Software

Take your digital pictures and turn them into photo albums! Use OnDVD to create digital photo albums to be played on your DVD player. Favorite photos can easily be turned into photographic prints for years of display. OnDVD makes it easy to turn digital memories into home entertainment!
